

Get involved with your local Soil and Water Conservation District

Are you interested in water quality, wildlife habitat, soil health, or invasive weed control?

Is the conservation of our shared natural resources important to you?

*Consider becoming an Associate Director
for the Clackamas Soil and Water Conservation District.*

Tell me about being an Associate Director?

Associate board members:

- Serve a non-paid, two-year term.
- Are appointed by the Board of Directors
- Attend a board meeting once a month, either in person or virtually.
- Participates during board meetings and contributes to board discussions but may not make motions or vote on board decisions.
- Augment the board's knowledge and experience.
- Serve on board committees or oversee special projects or tasks.
- Come prepared for meetings by reading agendas, minutes, and other designated materials sent out before the meetings.
- If preapproved, may attend board training and workshops regarding board activities and functions.
- May represent the District at special meetings around the county if directed by the Board.
- May volunteer at special events/meetings/activities sponsored by the District or their partners.

The time required to serve as an associate director varies from month to month depending on activity of the District.

An associate director can expect to commit to an average of at least 2 to 4 hours per month.

To be eligible you must reside and be a registered voter within Clackamas County.

What is a Soil and Water Conservation District (SWCD)?

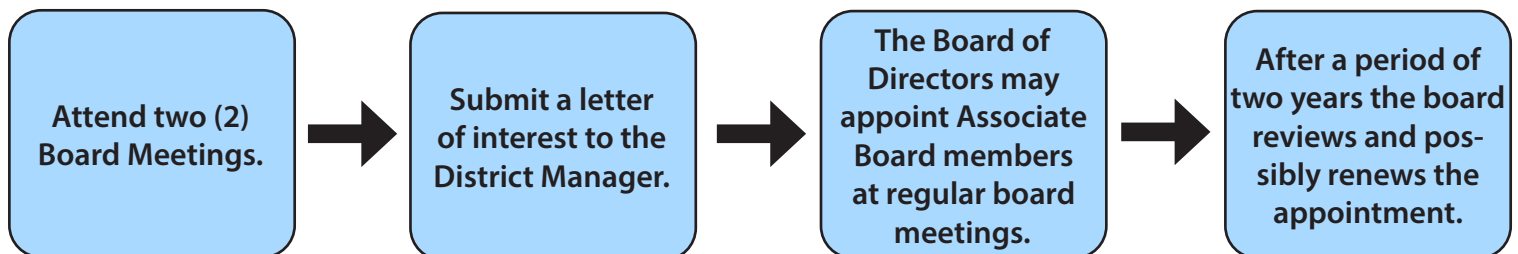

SWCDs were formed in 1939 in response to the Dust Bowl. They provided the connection between federal assistance through the Soil Conservation Service (now the Natural Resource Conservation Service) and local land managers.

Clackamas SWCD continues to provide conservation beyond technical assistance to land managers and property owners in rural as well as urban areas.

Funding for Clackamas SWCD is primarily from county taxpayer dollars, but we leverage those dollars in the form of grants and loans to help protect our shared natural resources. Oversight is provided by a locally elected board.

Our non-regulatory nature and long history of working with both private and public landowners and other valued partners help us build trust throughout the community.

How do I become an Associate Director?
