Do you need to dispose of old pesticides?

- * **Take advantage of this opportunity** to safely and anonymously dispose of old and unusable pesticides.
- * **This collection event is for waste agricultural pesticides**, in Washington and Clackamas Counties.
- * **You must pre-register** with the disposal service so they are prepared to receive your chemicals. To get an application, contact Clean Harbors, or the partners below. Complete and send application by mail, fax or e-mail to Clean Harbors Environmental by January 31, 2014.

or call Clean Harbors Environmental Services 503-785-0404

Submit Registration Forms to:

Craig Nordling

Clean Harbors Environmental Services

E-mail: nordling.craig@cleanharbors.com

FAX: (503) 655-3952

Mail: 16540 SW 130th Ave. Clackamas OR 97015

For Questions and Technical Assistance contact:

Nicole Anderson at OSU Extension will answer questions confidentially or will assess whether degraded chemical stores can be safely transported.

Call: (503) 553-9922 E-mail: nicole.anderson@oregonstate.edu

Craig Nordling at Clean Harbors Environmental can answer questions about pre-registration and disposal.

Call: (800) 819-5912 or (503) 742-7107

If you need to check the status of a pesticide.

Call: Oregon Department of Agriculture at 503-986-4635

E-mail: pestreg@oda.state.or.us

Do you have empty pesticide containers to recycle?

- * **You can recycle** clean, dirt and residue free, triple rinsed plastic containers. For triple rinse procedures see the Container Recycling Council (ACRC) web site: http://www.acrecycle.org/triple_rins.html Select Container Rinsing
- * **All size containers up to 55-gallon** capacity plastic drums can be accepted. Containers need to be made from high density polyethylene (HDPE) and embossed with recycling symbol #2.
- * **No pre-registration is needed** for dropping off empty, triple-rinsed pesticide containers. There is no service charge for this service.

Working together to keep our rivers blue and our farms green!

The Tualatin River serves as the primary source of drinking water for 300,000 Washington County residents. The watershed is also important for federally-listed fish species, irrigation, supporting industries, and recreational activities. All of these beneficial uses are affected by the quality of the surface water in the watershed.

Old and unused pesticides can enter waterways through leaching, flooding, or runoff. Chemicals collected from the watershed and disposed of are removed as threats to water quality. Help protect our drinking water source and fish habitat by bringing in your old and unused pesticides to this collection event for proper disposal.

Thank you for being good stewards!
