 Environmental
 Quality

Do you need to dispose of old pesticides?

- Take advantage of this opportunity to **safely and anonymously** dispose of old and unusable pesticides.
- This collection event is for **agriculture waste pesticides** in Washington and Clackamas Counties. Limited funds. Register early!
- **You must pre-register** with the disposal service so they are prepared to receive your chemicals. To get an application, contact Clean Harbors or Tualatin SWCD. Complete and send application by mail, fax or e-mail to Clean Harbors Environmental by **November 26, 2012**.

To Download Registration Forms:

www.swcd.net

or call Clean Harbors Environmental Services 503-785-0404

Submit Registration Forms to:

Clean Harbors Environmental Services

Email: ranf.alan@cleanharbors.com

Fax: 503-786-7877

Mail: 21402 SE Jennifer St.
Clackamas, OR 97015

For Questions and Technical Assistance Contact:

Tom Silberstein at OSU Extension - confidential answers to questions or will assess whether degraded chemicals can be safely transported.

Call: 503-373-3756 **Email:** tom.silberstein@oregonstate.edu

Alan Ranf at Clean Harbors Environmental can answer questions about pre-registration and disposal.

Call: 800-819-5912 or 503-785-0404

To Check the Status of a Pesticide:

Oregon Department of Agriculture

Call: 503-986-4635 **Email:** pestreg@oda.state.or.us

Do you have empty pesticide containers to recycle?

- **You can recycle** clean, dirt and residue free, triple-rinsed plastic containers. For triple rinse procedures see the Ag Container Recycling Council (ACRC) website at <http://www.acrecycle.org> and select the link for Container Rinsing.
- **All size containers up to 55-gallon** capacity plastic drums can be accepted. Containers need to be made from high density polyethylene (HDPE) and embossed with recycling symbol #2.
- **No pre-registration is needed** for dropping off empty, triple-rinsed pesticide containers. There is no charge for this service.

Working together to keep our rivers blue and our farms green!

The Tualatin River serves as the primary source of drinking water for Washington County residents, serving over 300,000 people. The watershed is also important for federally-listed fish species, irrigation, supporting industries, and recreational activities. All of these beneficial uses are affected by the water quality in the watershed. Old and unused pesticides can enter waterways through leaching, flooding, or runoff. Chemicals collected from the watershed and disposed of are removed as threats to water quality. Help protect our drinking water source and fish habitat by bringing your old and unused pesticides to this collection event for proper disposal.

Thank you for being good stewards!
